TO THE PEOPLE OF SEWARD AND ADJOINING COUNTIES

We have been running our flour mill now for six months and have been trying to introduce our goods through the local merchants, as we thought that the best way to do it; but this seems to be a failure as our merchants say they are not able to get the people of Liberal and vicinity to use this Home Made Flour. They don't seem to find any large amount of complaint on the goods but they simply don't seem to be able to get this flour out. Now the time has come when we are going to see if the people of the country adjacent to Liberal are not willing to use home made goods if assured that they are getting an article as good as is shipped in. You know that there is always a great howl made about patronizing home industries. We are now giving you that opportunity. We are now going to give the farmers a chance. We have been giving the grocers the opportunity for six months. We have an experienced miller and are paying him as good a salary as any mill in the country and we have as good machinery and process as any mill in the country and also have as good wheat as any place in Kansas and we are making as good an article as any shipped in and we guarantee every sack.

We are going to give the farmers and flour users of the country around Liberal a chance to buy their flour at wholesale price. We can afford to sell our goods at home for less money than by going off in a new territory and are **GOING TO DO IT.** We know that the people are not going to pay fifteen cents per sack more for their flour if they can help it and we are now going to give them an opportunity. We are going to sell our flour at the mill door to any one who comes after it and guarantee it equal to any flour sold in Liberal at the following prices.

Best Patent "Pride of Liberal" \$2.10 per hundred

"Lily" Second Patent \$2.00 per hundred

All Mill Feed at Market Prices

Bring your wheat to the mill and exchange if you wish or we will give you all or a little more for your good milling wheat than any other elevator. Come in and see us and we will give you a square deal. We expect to be a farmers mill from now on and put our goods out direct to the people.

We will run a delivery for the city trade two days in the week, Monday and Friday.
